Seals pipes without compromise.

With this conical sealing bag from Vetter, you will have a powerful aide that keeps pipes reliably sealed and, thanks to its cone shape, will fit almost all pipe profiles from circular, egg, mouth- shaped and rectangular right through to kite shaped.

Thanks to its light weight and compact transport format, this foldable sealing bag can be positioned quickly in the manhole using a drawbar eye. Once there it will impress you with its extremely resistant CR material in our usual Vetter quality – among many other things.

Seal pipelines of all types, even in places where installation is difficult, and concentrate on your on- site work in peace.

Once positioned, draining can be carried out quickly and easily using a vacuum adapter and suction without moving the bag in the pipe. As such, no separate compressed air cylinder is required and you profit from uncompromising quality Made in Germany.
